The Coopersmith Self-Esteem Inventory (CSEI) measures attitudes toward self in the context of pre-post evaluation, individual diagnosis, or classroom screening. From the CSEI Manual:

...self-image is the content of a person’s perceptions and opinions about [themselves]. The positive or negative attitudes and values by which a person views the self-image and the evaluations or judgments he or she makes about it form the person’s self-esteem.

The instrument consists of a brief self-report questionnaire and a school form for ages eight to fifteen years or adult form for ages sixteen and above. There is no time limit, but assessment typically takes fifteen minutes. It is hand scorable.

For more information including normative data, see the CSEI page at Mindgarden and other references below.

About Mind Garden, Inc.

Mind Garden is an independent psychological publishing company of leadership, coping, anxiety and many other assessments and developmental materials. Since 1994, Mind Garden has sought to preserve and grow important psychological assessments.
Mind Garden is unique in providing permission to reproduce their products. This is ideal for Ph.D. candidates and researchers wanting to modify instruments. Traditional paper is also available. Mind Garden can also provide samples of instruments and scoring in our Sampler Sets so that you do not need to order additional components to understand an instrument.

Administration, Analysis and Reporting

Statistics Solutions consists of a team of professional methodologists and statisticians that can assist the student or professional researcher in administering the survey instrument, collecting the data, conducting the analyses and explaining the results.
