For the past 22 years our dissertation consultants have successfully assisted graduate students in the schools of psychology, education, business, nursing, and numerous other fields. Our consultants advise graduate students from Walden, U of P, Nova, Capella, Walden, Argosy, and UCLA, University of Texas, and many online and brick-and-mortar universities in the areas from topic development to discussion recommendations in both quantitative and qualitative dissertations.

Statistics Solutions offers the following dissertation consulting services:

- **Research Topic Selection:** Quickly help you select a topic that is researchable, fits within your discipline, and gets approved.
- **Concept Paper, Proposal Writing, and Prospectus:** Work with you to develop research questions and testable hypotheses, find gaps in the literature, create a problem statement, select a theoretical framework, and sketch out a methodology.
- **Introduction:** Assist you to identify and articulate the research problem, describe the theoretical construct, and clearly talk about the nature of the study.
- **Literature Review:** Assist you to effectively search, select, organize, and summarize articles, then present in a way that tells a story and drives towards your research questions. We ensure the gap in the literature is clearly stated and aligns with the problem statement. We help replace and update articles as necessary.
- **Methodology:** Help you select and discuss the research design, and provide the steps necessary to carry out a qualitative or quantitative study. Ensure the data plan and sample size are accurate, and select the correct analyses.
- **IRB/URR:** Assist you in completing and navigating through the IRB review process. Help effectively address needed revisions to ensure speedy approval.
- **Data Management:** Help code, merge, clean, and overall manage your data.
- **Instrument Development and Evaluation:** Assist to select a reliable and valid instrument, or help you create your own survey or semi-structured interview.
- **Quantitative Data Analysis:** Validate your data plan, conduct descriptive statistics, assess

assumptions, and help to generate and present analyses, and create tables and figures.

- **Qualitative Data Analysis:** Assist in conducting case study, phenomenological, or grounded theory research. Help includes transcribing interviews, coding data, selecting themes, and assessing the reliability of the themes.
- **Discussion:** Help you to interpret your results, discuss the theoretical and practical implications of your findings, and the relation to existing literature. Assist in developing future research.
- **Editing:** Edit your dissertation document to ensure it meets your school's requirements, all tables and figures are APA, and efficiently address committee feedback.
- **PowerPoint:** Edit your PowerPoint slides to ensure highlights of your study are presented clearly.
- **Oral Defense:** Help prep you for preliminary and final oral defense.
